

*Umetnost ramova
i lepota prostora*

 **UKRAS**

40 godina

Firma UKRAS DOO iz Velikog Popovića osnovana je daleke 1970 godine i u početku je bila porodična radionica koja je izrađivala stolariju i građevinske lajsne. Danas Ukras ima preko 4500 m² proizvodnog i magacinskog prostora. Stalnim ulaganjem u mašine i opremu danas posedujemo liniju za lakiranje profila sa UV lakovima, najnoviju komoru za suvo farbanje uz pomoć robota, najsavremeniju opremu za CNC obradu drveta i sklapanje vrata. Više linija za profilisanje i oblaganje profila.

Proizvodni program

Proizvodnja lajsni za uramljivanje slika u preko 300 različitih tipova. Lajsne se rade od uvoznog drveta abahi (samba, ajus, wawa) iz Gane (Afrika). Samba se uvozi kao daska u suvom stanju i kao takva prolazi kompletan proizvodni proces primarne prerade drveta – profilisanje u odgovarajući profil – primarnog farbanja i završnog farbanja (nanošenje farbe na nitro, poliuretanskoj ili UV osnovi na liniji za farbanje) – tkz. pozlate (što je zapravo nanošenje različitih vrsta dekorisanih folija na odgovarajući profil koji je hemijski tretiran – toplo nanošenje folija bez lepka). Postoje i neki specijalni proizvodni procesi kao što je oblaganje profila aluminijumom ili nanošenje specijalne paste preko dekorisanog valjka na predhodno hemijski tretiranu lajsnu da bi se dobili odgovarajući ukrasi na lajsni. Kompletan proizvodni proces se radi uz pomoć mašina, a većim delom je automatizovan.

Proizvodnja lajsni za laminatne podove. Lajsne se rade u deset profila i preko 30 različitih dekora. Prvo se table MDF-a prorezuju na odgovarajuću širinu, a zatim profilšu na četvorostranim mašinama, nakon toga na specijalnim mašinama za oblaganje profila i uz pomoć lepka na temperaturi od 200 stepeni oblažu se odgovarajući profili lajsni melaminskom folijom u tridesetak različitih dekora (bukva, hrast, bavarski hrast, trešnja, orah, javor, jasen, ... itd).

Proizvodnja drvenih parket lajsni. Parket lajsne se izrađuju od drveta smrče sa izbačenim greškama drveta i furnirane prirodnim furnirom u preko 60 drvnih dekora i četiri profila koji prate najsavremeniji dizajn parketa. Završnim lakiranjem sa UV lakovima ispoštovani su svi najsavremeniji zahtevi i kompletno je zaokružen proizvodni proces u proizvodnji parket lajsni. U ovaj program spadaju i podne završne, prelazne i prelazno - završne lajsne kao prateći ali nezaobilazni program lajsni koji je neophodan kod pravilnog postavljanja parketa.

Proizvodnja zidnih obloga – sa svim pratećim završnim lajsnama. Ovaj deo proizvodnje firma Ukras radi već devetnaest godina .

Proizvodnja drvenih garnišni – garnišne se rade po meri kupca do pet metara iz jednog dela, maska se radi od drveta – wawa, a nosač je aluminijumski sa dva ili tri kanala.

Proizvodnja lajsni za kuhinje i plakare. Postoji pet profila lajsni koji su obloženi sa melaminskom folijom u šest-sedam različitih dekora. Veoma interesantan program za industriju nameštaja jer je firma Ukras u mogućnosti da odradi bilo koji profil na zahtev kupca ali uz odgovarajuću poručenu metražu. Takodje sklapamo frontove za nameštaj po meri kupca.

Proizvodnja unutrašnjih vrata. – ovaj program se obavlja na najsavremenijim mašinama i sve proizvodne operacije se obavljaju mašinskim putem. Vrata se rade u kombinaciji MDF-drvo-MDF sa L-pervajzima koji se obostrano podešavaju. Program sadrži proizvodnju belih unutrašnjih vrata sa velikim izborom kanalura, furniranih vrata sa furnirima hrasta, bukve, trešnja i oraha. Vrata se rade i po specijalnim zahtevima kupaca tako da su mogućnosti neograničene.

U našim prodajnim objektima prodajemo kompletan asortiman naših proizvoda, vršimo uramljivanje ulja na platnu, akvarela, grafika, ikona, goblena i ogledala. Režemo kartonski paspartu, uramljujemo ovalne ramove i blondele, prodajemo razne tipove slikarskih stalaka i platna nategnuta na blind ram sa kajlama. Prodajemo i profesionalne pneumatske mašine za spajanje ramova, municiju za te mašine, ručne pištolje za zakucavanje eksera i pločica, kao i sav potreban repromaterijal.

Nazubljene mesingane zakačke

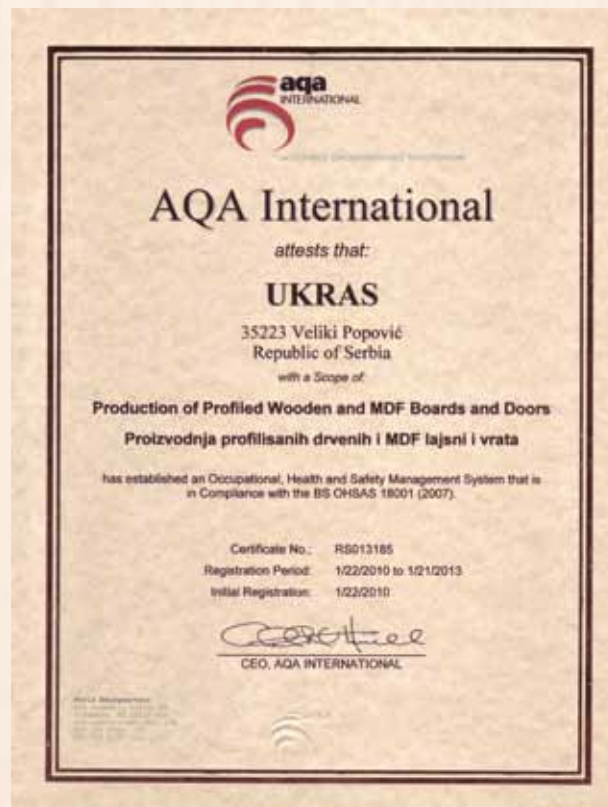

Dužina 56 mm.

Kupci sadašnjice, ne samo da očekuju kvalitetan proizvod, već zahtevaju i dokaz da je kompanija sposobna da proizvede kvalitetne proizvode ili pruži kvalitetnu uslugu. Obezbeđenje ovog dokaza bi trebalo da predstavlja prvorazredni cilj za svaku kompaniju koja drži do svog imidža i ima visoke pretenzije kad su u pitanju nova tržišta, **UKRAS** sigurno jeste jedna takva firma.

Međunarodni standard koji definiše sistem upravljanja kvalitetom, čiji je primarni cilj zadovoljenje potreba korisnika.

Implementacijom Sistema menadžmenta zaštite i bezbednosti zdravlja zaposlenih OHSAS 18001 (2007) doprinosi se znatnom smanjenju povreda na radu i poboljšanju radnih uslova.

IZJAVA O POLITICI IMS-a

Politika kvaliteta UKRAS D.O.O. je sastavni deo ukupne poslovne politike organizacije, zasnovana je na uspostavljanju, primeni i održavanju tržišno orjentisanog poslovnog sistema i na principima menadžmenta kvaliteta, sa ciljem potpunog zadovoljenja zahteva, potreba i očekivanja kupaca i drugih korisnika, uz stalno poboljšavanje sistema menadžmenta kvaliteta i povećanje efektivnosti i efikasnosti kompletnog poslovanja organizacije. Politika kvaliteta se povremeno preispituje i menja kada je to potrebno.

Politika kvaliteta UKRAS D.O.O. zasniva se na sledećem:

- Uvažavamo naše kupce, razumemo i balansiramo njihove potrebe i očekivanja sa potrebama i očekivanjima naših isporučilaca i zaposlenih uz nastojanje da potpuno zadovoljimo sve strane.
- Uspostavljamo i saopštavamo našu viziju organizacije i kroz liderstvo pojačavamo ključne vrednosti za usmeravanje ponašanja svih zaposlenih u ostvarivanju naše vizije.
- Uključujemo naše zaposlene u razvoj organizacije, koristimo njihovo znanje i iskustvo, prepoznajemo njihov doprinos i obezbeđujemo okruženje u kome su oni motivisani za ostvarivanje svih svojih mogućnosti.
- Prihvatamo procesni pristup u menadžmentu našeg poslovanja i upravljamo našim procesima kao jedinstvenim sistemom međusobno povezanih procesa, koji ostvaruje sve ciljeve organizacije.
- Obezbeđujemo okruženje u kome je svaka osoba motivisana da stalno poboljšava kvalitet proizvoda efikasnost i efektivnost procesa i sistema menadžmenta.
- Zasnivamo naše odluke na logičnoj i intuitivnoj analizi prikupljenih podataka, kada je moguće iz preciznih merenja karakteristika proizvoda, procesa i sistema.
- Razvijamo savezništvo sa našim isporučiocima i radimo sa njima na zajedničkom poboljšavanju performansi.
- Koninuirano vršimo identifikaciju opasnosti štetnosti i preduzimamo mere za stalno poboljšanje bezbednosti zdravlja zaposlenih
- Primenom savremene opreme i tehnologije, kao i preventivnim delovanjem smanjujemo moguće rizike na najmanju moguću meru.
- Praćenjem i primenom zakonskih propisa koji nalažu primenu mera za bezbedan i zdrav rad.
